## - CHARACTER CREATION -

### STEP 3:

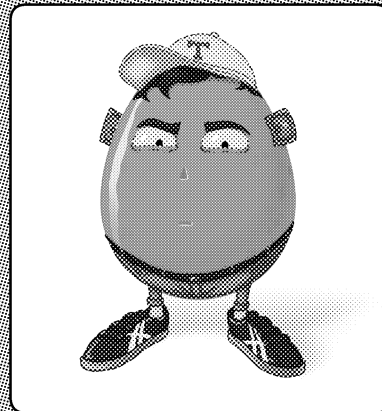

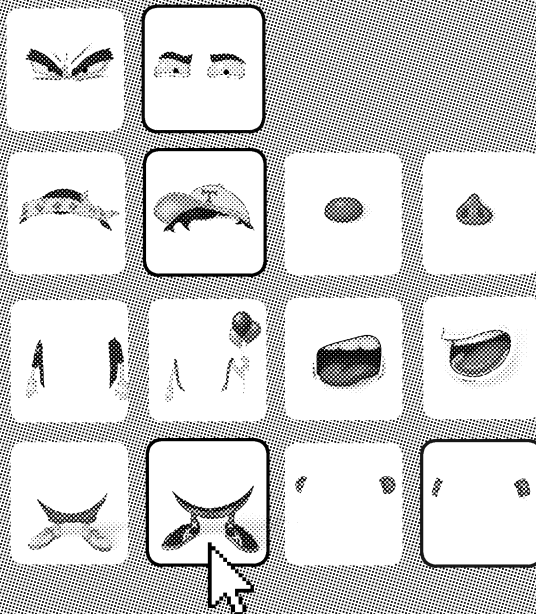

Visit the Tamag-O-Lab to create your character

Choose a body among the ones you own and select it.  
Select in your stock of available parts those you want to stake on the body to create your TamagoSan. You can unstake and stake parts with no limitations. Once body parts are staked on the body if you decide to trade or sell your TamagoSan, the parts attached on it will be part of the trade. The new holder will be able to unstake parts & stake new ones.

## - PARTS CLASSIFICATION -

### FACIAL PARTS:

WEARABLE PARTS: Classic (common), Advanced (uncommon), Epic (rare),  
Legendary (very rare)

### WEARABLE ACCESSORIES:

## - RANDOM & FULL-SET CHARACTERS -

Each wearable part belongs to a Set. For example the pirate set (JackySan)

Bringing all parts from a set together improve your TamagoSan by automatically adding the "Full-Set" attribute in Metadata & a sticker on your Nft. Removing or replacing one of the parts will remove both the Full-Set attribute & the sticker.

## - PARTS SWAPPING -

### Step 1:

Visit swapping channel on Discord and find parts to swap with other TamagoSan holders. Once you find an agreement, start swapping procedure.

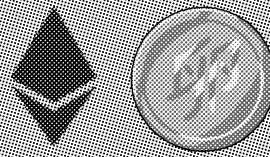

### Step 2:

Holder A:

Visit <https://apps.tamagosan.io/swap>

Select parts to swap from your unstaked parts stock.

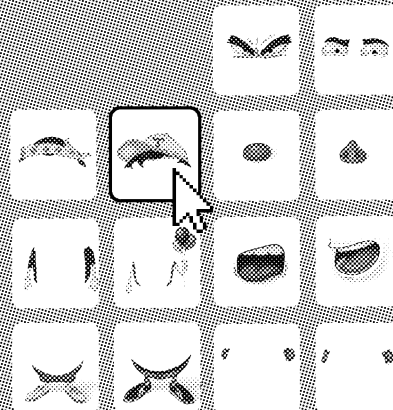

You can add \$Tsan in the deal according to your agreement with holder B.

### Step 3:

Enter wallet address of holder B.

Initiate swapping.

### Step 4:

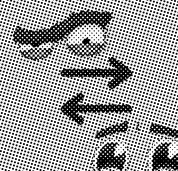

Holder B:

Visit <https://apps.tamagosan.io/swap> & go to pending swap tab.

Check that parts and \$Tsan amount selected by holder A are correct.

Select the parts and and/or \$Tsan amount according to your agreement.

Confirm swapping.

### Step 5:

Holder A:

Check that holder B chose the right parts and/or \$Tsan amount and validate swapping.

### Note:

Our escrow contract is totally free & secured. Each holder can stop the swapping procedure at any moment before the end of step 5.
